-  Thủ Đức

## Education

**Hutech University | 2022 - Present**

Major: Information Technology

Specialization: Software Engineering

## Skills

Javascript Basic

C Programming

Unreal Engine

HTML

CSS

Logical and Analytical Thinking

Design & Problem-Solving Skills

## School Project

### **Zombie Game Development with Unreal Engine 5 | 2/2025 - 3/2025**

Team leader, main contributor (90%)

Designed, programmed, and developed a zombie game using Unreal Engine 5.

Utilized **Blueprints** to build gameplay.

Implemented **character system, map system, basic zombie AI, and combat mechanics** in the game.

**Result:** Completed a demo zombie game with basic gameplay and potential for further expansion and development.

### **Text-based Story Reading Website Development | 3/2025 - 6/2025**

Team leader, main contributor (55% of the project)

Designed architecture and developed core features of the story reading website.

Implemented **frontend (HTML, CSS, JavaScript)** and integrated **backend (Node.js/MySQL)**.

Managed progress, assigned tasks, and coordinated with team members to complete the remaining 45% of the project.

Optimized user experience (UI/UX) and ensured stable operation of the website.

**Result:** Completed a basic online story reading website with search functionality and smooth cross-platform reading experience.
